

The Company

Stocker-Crew distributes all manner of machinery for Vegetation and Grass Maintenance, Tool Carrier Tractors, Front PTO & 3 Point Lifters for Agricultural Tractors, Switching cooling fans and other accessories/ implements.

Stocker-Crew's primary regard is quality; an element essential to the long term success of our competitive position, reputation and customer satisfaction.

Announcement

We have received some excellent feedback from our first edition of Crew-News and will strive to maintain the high-quality presentation now expected of our mailout.

If you do not wish to receive any more Crew-News mailouts, send an e-mail to:

Reform MOUNTY 100 H

The new Mounty 100 hydrostatic is the latest in high-tech tractors from Reform.

Utilising a 3-litre, 4 cylinder, turbo-charged Daimler- Chrysler engine, the Mounty 100 generates an astonishing **95 HP**. Maximum torque of 335 Nm is available at 1,320 rpm.

The Mounty 100 also has 4-wheel steering (Ideal for grounds care - will not tear up turf!) - switchable to front-wheel, rear-wheel and crab steering mode by simply pressing a button.

Extremely suitable for slopes, the Mounty 100 has a low centre of gravity. Coupled with the power to carry almost any implement imaginable, the Mounty 100 H is the obvious choice for varied work conditions and practices.

Operator comfort

Comfortable, deluxe seating and air-conditioned cab with the best panoramic view to front and rear implements.

Front and rear linkage and PTO for maximising work loads.

Contact us for more information on the Mounty 100 H.

Cleanfix 'MC'

Reversible fans for radiator cleaning.

Consequences of obstructed intake screens and radiator cores include decreased machine performance, increased fuel consumption, reduced component life, increased downtime and interruption of production to clean radiators, as well as the obvious damage caused by overheating.

The solution: A Cleanfix reversible fan system with its integrated air cylinder and eccentric blade linkage reverses the fan airflow whilst the engine is still under full power.

The nine blades rotate on their individual axis to create optimum cooling and cleaning performance.

Additionally, Cleanfix fans can be fitted with the innovative 'thermo-element' option. **Cleanfix Multi Control (MC)** saves up to 60 per cent of the fan's power consumption.

A 5 kW increase in performance at the crankshaft and at the same time, a 6 per cent fuel reduction can be achieved.

Cleanfix prevents overheating of the engine, gear box and hydraulic system. Work interruptions and downtime is reduced dramatically.

Contact us for more information on Cleanfix.

More power to Metrac

H7S hydrostatic with a new 3 litre, 4 cylinder diesel

Double-acting Service Lines

Front 3-point hitch and PTO.
The accessories:

Two hydraulic hoses and all the fittings on the back of the tractor, including two connectors (male/female) for the front of the tractor.

EPR (Electronic Position Resume) Front linkage control

with headland height management. The EPR system allows the user to program the position of the lift arms. (Only for tractors with Load Sensing Hydraulics!)

Accumulator and Pressure Gauge

The accumulator protects the tractor, Implement and linkage from over-loads.

Weight Carrier

Uses tractors original weight blocks. Depending on the tractor, carriers are available from 700 kg, up to 1600 kg.

Quick 'A' Frame

This frame can carry various implements up to a maximum weight of 1400 kg.

Front remote control

For easy use of the Front Linkage, to connect Implements. Only for tractors with electric spool valves. Selected models.

Chain support

A set of supports to fit on 2 models of top link carriers - (old / new).
Version: Crossbar / Top plate

New mulcher range from Stocker-Crew

New from STOCKER-CREW is the Carroy flail mower range.

For your out-front mowers

Weighing in at approximately 200kg, the T-1524 series flail mower is versatile enough to be mounted on almost any out-front mower, and yet still capable of tackling any difficult work thrown at it.

Super heavy-duty front-mount

The TPITF 2070 is a heavy duty safety flail mulcher for front mounting. Useful for roadside mowing on tractors up to 100 HP.

Super heavy-duty rear-mount

The TPET 2070 is a heavy duty safety flail mulcher for rear mounting. Useful for roadside mowing on tractors up to 100 HP.

Both tractor mount mulchers have reversible gearboxes allowing the operator to change rotor shaft direction as required by the task at hand.

Gyral Ezi-Edging

Revolutionary commercial path & kerb edger

The Ezi-Edger by Gyral Implements is a tough and cost effective solution to trimming and edging pathways.

The compact, robust mid mounted design ensures a positive response in following the pathway or kerb. A deviation of 150mm from the optimum driving line is easily tolerated.

Ground speeds of up to 8 km/h can be achieved under ideal working conditions.

Available as a single or double mount unit, each edger is controlled by an independent hydraulic control that allows the operator the flexibility for single or double edging at any point along a pathway. Curved and winding pathway is easily trimmed with this versatile equipment.

The ezi-edger raises for road travel

SIMPLE : EFFECTIVE : DURABLE : FAST
