

The Company

Stocker-Crew distributes all manner of machinery for Vegetation and Grass Maintenance, Tool Carrier Tractors, Front PTO & 3 Point Lifters for Agricultural Tractors, Switching cooling fans and other accessories/ implements.

Stocker-Crew's primary regard is quality; an element essential to the long term success of our competitive position, reputation and customer satisfaction.

Announcement

It has been a long time between our Crew-News editions! We have truckloads of new info and details for our valued customers. We hope you enjoy this latest edition of Crew-News!

If you do not wish to receive any more Crew-News mailouts, send an e-mail to:

Zuidberg Front Systems

Zuidberg Engineering develops for almost every type of tractor a front linkage and PTO-system using the latest CAD software systems.

Zuidberg Techniek BV is one of the most specialised production plants in the agricultural sector. Innovation and specialism in the newest computer-controlled machines distinguishes the company from the rest of the market.

Front linkage:

- Integrated design, the Zuidberg front linkage becomes an integrated part of the tractor with the front linkage system
- Solid construction, manufactured from high-quality components and materials
- Complete range with various lift capacities
- Compact fitting
- Easy mounting system

Front PTO:

- Custom made for all tractors
- ECON-system with a 60-degree free turn to make the coupling of implements easy
- High power output with oil cooler for optimum temperature control
- Adjustable proportional engagement system guarantees a long lifetime for your implements
- Easy maintenance, replacing a V-belt is simple

Practical Advantages for the user.

Some examples of possibilities and advantages a Zuidberg system offers:

- Soil preparation and sowing can be done in just a single run.
- Improved visibility of the machines mounted on the front linkage reduces stress for the user and increases operating safety.
- Efficient mowing with the mower front mounted and pickup at the rear.

There are three main advantages of the Zuidberg Front linkage and PTO system; labour, fuel and a more efficient use of the tractor.

CivEnEx Expo

See us at the show!

Stocker-Crew will be at the Civenex show - Australia's premier exhibition for Local Government, Public Works and Construction

Stand 340

Drop in for a chat! 24th & 25th May 2006

Cleanfix fans

The Cleanfix fan is ideal for dirty grills and radiators and aims to eliminate cooling overcapacity in engines by decreasing the radiator fan blade angle and running power.

Proven as a performer when engine cooling radiators and screens are restricted by air borne contaminants leading to a potentially dangerous overheat.

Each fan blade is connected to the fan hub air piston by an eccentric pin and bearing. Air is pumped into the hub and the piston moves each fan blade rotating it 90 degrees to the switched position.

Airflow has now reversed and blade efficiency ensures air flow out is equivalent to air flow in. Radiators and screens are purged of contaminants. Piston air pressure is released and the spring tension causes the fan blades to rotate again on their individual axis to the standard work position.

The machine operator can concentrate on work as this switching can be done automatically by an on board fan timer/controller.

"Kits to suit internal combustion engines from 25hp to 750hp"
